

Locally owned and operated, Optic One has been serving the Inland Northwest since 1993. We have long been recognized as one of the leading and most progressive providers of eye care in the Inland Northwest.

Always a leader in optometric technology, Optic One's clinics are "paperless," which allows our doctors the ability to access a patient's information on demand, even when an office is closed. Your electronic chart is safe and secure, but easily reproduced and transferred when coordination of care with other eye care or medical professionals is dictated.

The comprehensive services we offer are enhanced by our state-of-the-art testing equipment. Our clinics are equipped with many of the newest and best diagnostic tools available, including Zeiss Optical Coherence Tomography (OCT), visual field analyzers and a digital retinal imaging camera.

Optic One's clinics boast an impressive selection of retail products, including the largest eyewear frame inventory in the Inland Northwest. Our huge selection offers frames for all tastes and budgets from hip celebrity style to conservative classic. We carry many exclusive lines including ProDesign, Gucci, Caviar, Dior, and Ralph Lauren. Only the highest quality optical lenses are used and our in-house lens finishing lab means your eyewear order is completed quickly. You will also find a large selection of vision enhancement devices, ocular vitamins, specialty frame cases, and sports and fashion eyewear accessories.

Are you a contact lens wearer looking for something special? Our doctors fit all styles of contact lenses and we can also custom tint your contacts to the color of your choice.
